DETAILED ACTION

Receipt is acknowledged of the amendment, filed on 6/16/2004, which has been entered in the file. Claims 16, 39-47 and 60 are pending.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Stefan U. Koschmieder (50,238) on 6/29/2004. The examiner's amendment was necessary in order to remove any claim objections or rejections under 35 U.S.C. 112 2nd paragraph, and to further clarify the claims.

The application has been amended as follows:

In the claims:

Claims 1-15 (Canceled).

Claim 16 (Previously Presented): A security thread comprising an insulating support bearing a flexible integrated circuit comprising a semiconductive organic polymer, provided with electrical contacts for the integrated circuit.

Claims 17-38 (Canceled).

Application/Control Number: 09/692,371

Art Unit: 2876

Claim 39 (Currently Amended): <u>The security thread</u> The substrate according to claim 16, wherein the organic polymer is selected from conjugated polymers.

Claim 40 (Currently Amended): <u>The security thread</u> The substrate according to claim 16, wherein the organic polymer is <u>at least one of selected from oligomeric</u> pentacene, poly(thienylene vinylene) or poly-3 alkylthiophene.

Claim 41 (Currently Amended): <u>The security thread</u> The substrate according to Claim 16, wherein the integrated circuit is a contactlessly readable integrated circuit which can be read in an inductive or capacitive manner.

Claim 42 (Currently Amended): <u>A substrate comprising the security thread</u> The substrate according to Claim 16, wherein the integrated circuit forms part of an optical active element.

Claim 43 (Currently Amended): A substrate comprising the security thread The substrate according to claim 16, wherein the integrated circuit comprises a preprogrammed code which is applied before incorporating the circuit in the substrate.

Claim 44 (Currently Amended): A substrate <u>comprising the security thread</u> according to claim 16, wherein the integrated circuit comprises a code of an intrinsic

Application/Control Number: 09/692,371

Art Unit: 2876

property of the substrate, which code, after the substrate has been produced, is

arranged in the integrated circuit.

Claim 45 (Previously Presented): The substrate according to claim 43, wherein

Page 4

the code is an encrypted code.

Claim 46 (Currently Amended): A substrate comprising the security thread The

substrate according to claim 16, wherein the substrate comprises additional security

features.

Claim 47 (Currently Amended): The substrate according to claim 46, wherein an

additional security feature is selected from at least one of a dye, fluorescent material,

luminescent material or phosphorescent material.

Claims 48-59 (Canceled).

Claim 60 (Currently Amended): The security thread The substrate according to

Claim 16, which further comprises an insulating layer on said semiconductive organic

polymer.

Claim 61 (Canceled).

Art Unit: 2876

ì

Allowable Subject Matter

2. Claims 16, 39-47 and 60 have been allowed over the prior art of record. The reasons for allowance were set forth in the office action mailed on 3/17/2004.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jared J. Fureman whose telephone number is (571) 272-2391. The examiner can normally be reached on 7:00 am - 4:30 PM M-T, and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
